

HISTORY & HIGHLIGHTS:
ADVANCED CONSTRUCTION COMPANY

The company is usually a name and a reputation of credibility reflected by people who run and operate it.

ADVANCED CONSTRUCTION CO. was established in 2002 in the Kingdom of Saudi Arabia, then rapidly maintained an honorable reputation in providing contractual expertise for executing contracts in various fields of Civil Projects, Roads and Bridges Construction, Sewage and Storm Water Networks, Marine Construction, Electro-Mechanical Projects, Finishing Contracting all over the Kingdom.

Our early history is intimately related to the booming forecast where every single company had to take a place under the sun of intensive and rushed projects. We managed all through to maintain a very sustainable development and steady growth and progress acquiring the needed experience to provide excellence in designing and executing projects.

As a result, the Company expanded all over the Kingdom of Saudi Arabia in order to acquire a larger market share by providing wider contractual services, for that purpose, we opted to change our Target to the Governmental Projects in 2005.

The new methodology with the expertise of the past had to look for a new strategy focusing on more advanced and sophisticated styles in Civil Projects, Roads and Bridges Construction, Sewage and Storm Water Networks and Marine Construction.

We injected more key personnel as fresh blood into our new company to face the era of specialization and the fierce competition where mercy is not available for weak companies and lack of expertise and experiments.

Based on this concept we had to assume the great responsibility of combining the distinct Performance Engineering and experienced management team adopting highest quality standards and the latest systems to acquire the satisfaction of the conscious clients through the following:

- Set of Rules and Procedures to lead and control operations with special emphasis on quality control and quality assurance.
- A strategic plan to guide future steps.
- Cooperation with foreign companies for more support to the provided services.
